

# **KENYA** THE COOLEST TRIP IN AFRICA

July 16 – August 4, 2013 Tour Leader: Scott Watson Report and Photos by Scott Watson

Sunrise and Ostrich, a typical start to your day in Kenya.

#### **Introduction**

This custom tour, which basically runs the same as our set departure, was the single most productive tour for birds and mammals I have ever guided! With a bird list of 692 species combined with a mammal list of 66, you would be hard pressed to top this anywhere else in the world in 3 weeks, while still getting a full nights sleep, mid-day time off, and a daily taste of Tusker. Kenya truly is a country of variety. From high elevation moorland, lush savannah, desert thorny scrub, coastal mangroves, and everything in between, it is no wonder we often yield a high species list. I often recommend that if you were to take only one trip to Africa, it should

be Kenya. This tour was not timed to get a huge species list, since the European migrants were not present yet, but instead timed to get the most out of the Wildebeest migration in the Masai Mara Reserve. Highlights were plentiful for this tour, and it is hard to peg down and one highlight. Big cats are always a favourite, and they put on a show for sure. Seeing a family of Cheetah feeding on a Thomson's Gazelle, and then finding Serval and a pride of Lions 20 minutes later was cause for a morning celebration. Then watching a Leopard at a "feeder" in the east was simply too easy. Watching thousands of wildebeest cross the Mara River guarded by 20 foot Nile Crocodiles puts the reality of the food chain in your face. Then, being in the middle of the commotion while the huge African Crowned-Eagle attacked a troop of Blue Monkeys in Kakamega Forest, and finding the rare Sokoke Scops-Owl and weird Golden-rumped Elelphant-Shrew in the coastal Sokoke forest. These are just a few of many great memories.

Lioness in protection mode, Lake Nakuru NP.

# Itinerary

- July 16 Lake Magadi.and Nairobi National Park
- July 17 Drive to Masai Mara.
- July 18 Masai Mara Reserve.
- July 19 Masai Mara Reserve.
- July 20 Masai Mara to Kisumu, Lake Victoria.
- July 21 Kisumu to Kakamega.
- July 22 Kakamega Forest.
- July 23 Kakamega Forest.
- July 24 Kakamega to Lake Baringo.

- July 25 Lake Baringo to Lake Nakuru.
- July 26 Lake Nakuru to Lake Naivasha.
- **July 27** Naivasha to Aberdares Mountains to Mount Kenya.
- July 28 Mount Kenya.
- July 29 Mount Kenya.
- July 30 Mount Kenya to Nairobi.
- July 31 Nairobi to Tsavo West.
- August 1 Tsavo West through Tsavo East to Malindi.
- August 2 Arabuko-Sokoke Forest and Mida Creek.
- August 3 Arabuko-Sokoke Forest and Sabaki River Mouth.
- **August 4** Flights from the coast to Nairobi connecting with international departures.

#### July 16: Lake Magadi and Nairobi National Park

Our first birding of the tour started with a trip south of Nairobi to the saline Lake Magadi. Although the Lake was our final destination it took a long time to get there as the road leading was very birdy indeed. Our first birds were **Marabou Storks** which we actually found frolicking amongst the Nairobi traffic. Moving out of the city and over the Ngong Hills where the habitat changes and we had our first **Schalow's Wheatear**. Once we started descending into the Great Rift Valley we came upon a couple nice flocks in the acacia scrub which held sharp looking **Red-throated Tits, Banded Parisoma, White-bellied Canary,** and **Red-and-yellow Barbet**, amongst others. Further along we went for a stroll and found **Blue-capped Cordonbleu** and **Southern Grosbeak-Canary**, while close by a **Jackson's Hornbill** was calling, three great target birds acquired. Suddenly 2 **Abyssinian Scimitarbills** flew over and landed in a nearby acacia showing off their bright red, curved, bills. At the lake the main target was **Chestnut-banded Plover**, which we saw right away.

The Meadowlark look-alike, Yellow-throated Longclaw.

Backtracking we made it to Nairobi National Park for lunch. Visiting this park feels quite strange as it it literally right inside of the city, an odd place to start a safari. Seeing **Zebra**, **Hartebeest**, **Giraffe**, and even our first **White Rhino** with the Nairobi skyline looming in the distance is quite unique, but the birding here is

amazing and is a must visit. In fact about 600 species have been recorded in Nairobi N.P. within the city limits, making Nairobi the world "birdiest" capitol. We saw many great birds here this afternoon including the localized **Nairobi Pipit, African Rail, White-bellied Tit, Hartlaubs's Turaco, Scarlet-chested Sunbird**, and many more. Our first day of birds and big mammals comes to an end. Spirits are high in excitement for the rest of the tour.

The docile and graceful Giraffe, always a favourite.

#### July 17: Nairobi to Masai Mara

This morning the goal was to complete the long, dusty drive to the famous Masai Mara Reserve. But first we had a few targets to get not far from Nairobi. Our first stop were the Limuru Ponds where we scanned for a while and picked up great trip birds such as **Maccoa Duck** and even a **Madagascar Pond-Heron**. Next we were off to try and find one of Kenya's eight endemic species, the **Sharpe's Longclaw**. We searched the high elevation grassland of the Kinganop Plateau. It took a bit of searching and walking through some fields but we eventually found our prize target. Satisfied with our clean-up of the mornings targets we were on our way west. On the way **Hildebrant's Starling, Bare-faced Go-way-birds**, and a plethora of weavers broke up the drive. Getting closer to reserve agriculture died off and grass plains opened up. We found out first **Thomson's** and **Grant's Gazelles**. Zebra and Giraffe meters away from our vehicle amazed us, and soon after one of the more difficult birds on tour landed right in front of us. A male and female **Yellow-throated Sandgrouse** gave us great looks, while close by **Double-banded Coursers** blended in with its surroundings perfectly. Only when they move can one really get a look at this cryptic species. **Fischer's Sparrowlarks** came in by the flock as the sun set on our first night in the Mara.

A Masai man and his herd.

#### July 18 & 19: Masai Mara Reserve

Exploring the Masai Mara is any wildlife enthusiasts dream. This is THE place in the world to see large mammals by the thousands, and each day here we were seeing tens of thousands of mammals. We had timed this tour for the famous Wildebeest migration where great herds of Wildebeest mixed with Zebra make their annual movements from Tanzania and into Masai Mara. With movements of this many herbivores, predators are never far away. On our first morning we found 3 large male Lions, as well as a male and female mating pair. It was incredible to see the Lions at their most intimate, if only for 3 seconds every ten minutes. As **Coqui Francolin, Harlequin Quail**, and **Yellow-throated Longclaws** flushed from the road overhead the savannahs aerial apex predator, **Martial Eagle**, dominated the sky. We even found one as it finished off its Banded Mongoose meal. Our driver, Peter, expertly navigated the dirt tracks and got us on to a family of **Cheetah** just as they finished their gazelle breakfast. This was the single mammal highlight for the group. These endangered cats are indeed the fastest in the world, but their elegance has to be seen to believe. It was truly a privilege to watch a strong mother with 3 very large cubs in their grassland element. Indeed for me, the reason to visit Masai Mara. Soon after the Cheetahs we visited an area for **Rufous-bellied Heron** which we quickly found, also finding **Gray Kestrel, Kori**, and **Black-bellied Bustards** en route.

Martial Eagle with Banded Mongoose prey, the aerial apex predator.

Driving to another area of the Reserve a huge number of Wildebeest had gathered. As far as the eye could see the grass was littered with mammals. It is a treat to witness this fluid mosaic of life. Amongst the Wildebeest were hundreds of Topi, and Thomson's Gazelle, but we also found 2 separate prides of Lion, numerous Spotted Hyena, and a few Black-backed Jackal. Finding kills, old and fresh, was a regular occurrence, and was great to see the vulture diversity here. **Lappet-faced, White-backed**, and **Hooded Vultures** were in large numbers literally cleaning up the grasslands. We also did well finding all the small bird species, cleaning up all the Cisticolas needed, including **Trilling Cisticola**.

White Helmetshrikes are common, and travel ion noisy flocks, always a favorite

This mother Cheetah and her 3 large cubs were voted top mammal of the tour.

Another great highlight was to witness the Wildebeest and Zebra crossing the Mara River. A well known subject for wildlife documentaries, it is indeed very hard to predict exactly when they will make their crossing, and the timing changes every year. So to see 3 different crossings was indeed very fortunate. This is a very stressful time for these animals as massive Nile Crocodiles also gather at the crossing spots for this seasonal buffet. Indeed the river is strewn with hundreds of carcasses, and we even witnessed a huge croc take out a young Wildebeest. It was amazing to see the raw power of nature, and the annual predator/prey relationships that have gone on in this area for millennia.

Huge Nile Crocodile with young Wildebeest prey. Mara River, Masai Mara.

Thousands of Wildebeest cross the Mara River, where it pays to be cautious.

#### July 20: Mara to Kisumu (Lake Victoria)

From the savannah of the Mara we headed north-west to the shores of Lake Victoria. Although very urban and populated compared to the Masai Mara there are a whole host of new species to find, namely in the Papyrus swamps bordering the lake. Before getting to the shore though we had great looks at the beautiful **Black-headed Gonolek, Red-chested Sunbird, White-throated Bee-eater**, and **Black-headed Weavers**.

After checking into our hotel we immediately headed back out to the beautifully named Dunge Swamp. Our main quarry here is Papyrus Gonolek as well as other marsh inhabitants. We tried for some time for the Gonolek, but alas we had to settle for a heard only for this secretive species. Alas we still got some great birds such as **Papyrus Canary, Slender-billed Weaver**, and the cute **Carruther's Cisticola**.

Young Afriacan Savannah Elephant still learning to use its trunk.

#### July 21: Kisumu to Kakamega

This morning we decided to take one more shot at a different area of Papyrus swamp, but again could not get at look at Papyrus Gonolek, annoyingly only heard deep in the swamp. This being said we had a great morning finding some more new birds we could only get here including; **Greater Swamp-Warbler, Marsh Tchagra**, and **Blue-headed Coucal**. With our morning success we were off to Kakamega. The Kakamega forest is a relatively small, and increasingly isolated block of Congolese rainforest, the only remnant of its kind in Kenya, and is therefore a crucial stop for any birding circuit of the country. In fact there are about 150 species we can only see here on tour, making these 2 days very important for the trip lists success.

Part of the beautiful Papyrus swamp edging the famous Lake Victoria. Note the Swamp Flycatcher left of center.

We arrived in Kakamega by mid-afternoon and immediately started birding the road. Right away we got into some flock activity, which included some tricky skulkers like **Banded Prinia** and **Black-faced Rufous-Warbler.** Entering our hotel grounds at the beautiful Rondo Retreat it was clear that this was going to be a very "birdy" area. On arrival we were greeted by the weird **Great Blue Turaco**, which was nesting on the hotel grounds. Simply going to our rooms to drop off our luggage we had to stop to see the nearby **Gray-headed Negrofinch, White-chinned Prinia**, and **Vieillot's Weavers**. Our final bird of the day was a **Mackinnosn's Fiscal**, of which there is a resident pair using the lodge as their feeding ground.

The Equatoril Akalat, a shy species of the forest undergrowth in Kakamega.

Black-billed Weaver in Kakamega Forest collecting nest materials.

## July 22 & 23: Kakamega

These two full days in the forest turned out to be very productive for us, with too many highlights to list. We were up before the sun each morning in order to get a head start, rewarding us with one of the best dawn choruses in east Africa. Birds seemed to be everywhere, and singing from every branch, hopefully this spectacle will be around for future generations in this increasingly pressured forest. Still birding close to the lodge grounds we found a very confiding White-spotted Flufftail, Equatorial Akalat, Brown-chested Alethe, Grey-winged Robin-Chat, White-tailed Ant-Thrush, and Dusky-crested Flycatcher. We did very well for Barbet species over these 2 days seeing; Yellow-rumped Tinkerbirds, Yellow-spotted, Hairy-breasted, Yellowbilled, and Double-toothed Barbets, indeed a great haul. Birding the road a few kilometres from the lodge we nailed other specialties such as Oriole Finch, Mountain Wagtail, Red-headed Bluebill, and Red-headed Malimbe. The Oriole Finch in particular was a real surprise, rarely seen, but we found it feeding on roadside berries 10 feet away. We also did quite a bit of birding from the forest trails, which is always a treat in this stunning forest. Best birds found were; Least Honeyguide, Turner's Eremomela, Scaly-breasted and Brown Illadopsis, Luehder's and Bocage's Bushshrikes, Brown-throated, Chestnut, Jameson's, and Yellowbellied Wattle-eyes, Green Hylia, Southern Hyliota, Petit's Cuckooshrike, and even Bar-tailed Trogon. Some real excitement came while watching a troop of Blue Monkey's. While calmly feeding they suddenly burst into deafening screams, no sooner a massive Crowned Hawk-Eagle came hurdling through the trees narrowly missing a monkey high in the canopy. This kind of predator prey activity is not simply limited to the savannahs. This being said we also found a couple of Red-tailed Monkey troops, shyly moving through the trees. All of these targets, and many more, make this a truly amazing birding site, and when combined with very comfortable accommodation and great food, it is always a favourite birding location.

The mighty Crowned Hawk-Eagle just after narrowly missing a Blue Monkey in Kakamega.

D'Arnaud's Barbets in full display mode.

#### July 24: Kakamega to Lake Baringo

Today our drive crosses through many different habitats, and the only way to get a big list is to take advantage of these habitats as it may be the last time you see them. First we birded a highland marsh, finding **Jackson's** and **Fan-tailed Widowbird**, **Yellow Bishop**, and **Tinkling Cisticola**. Stopping for lunch in the Kerio Valley (part of the Great Rift Valley system, we found the voted bird of the trip, the simply stunning **White-crested Turaco**. We had walk away views of a pair courting each other, showing their truly amazing color contrast from deep white to emerald green.

Voted bird of the trip, it is hard to argue when you see these White-crested Turacos.

Arriving at Lake Baringo we met up with the famous Baringo Bird Boy's who quickly got us onto some otherwise tough (and time consuming) species. In no more than 30 minutes we saw roosting **Grayish Eagle-Owl, Northern White-faced Owl, Slender-tailed Nightjar, Spotted Thick-Knee**, and **Three-banded Courser**. Other good birds they got us on were **Great Spotted Cuckoo, Red-fronted Barbet**, and **Pygmy Batis**. Next we were off to our lodge at the very flooded Lake Baringo, of which all the Rift Valley lakes are. This flooding is very concerning here, since the water strangely will not stop rising. As the sun started to set **Bristle-crowned Starlings** greeted us in the parking lot, while after dinner we went out and tracked down a calling **African Scops-Owl**.

The beautiful Three-banded Courser roosting at Lake Baringo.

# July 25: Lake Baringo to Lake Nakuru

Morning birding around the acacia scrub around Lake Baringo was productive, and the cloud cover made it bearable. A small flock held; **Mouse-colored Penduline-Tit, Somali Tit, Three-streaked Tchagra**, while **Madagascar Bee-eaters** and **Klaas's Cuckoo's** flew overhead. A quick, yet muddy stop for **Brown-tailed Chat** was successful, and another stop for **Black-headed Lapwing** in a soccer field was a win for the group. Back to the lodge for breakfast, the lodge staff put out some food for the birds, so while we ate we watched, **Red-billed Hornbill, Golden-backed Weaver, White-billed Buffalo-Weaver**, and the range restricted **Northern Masked-Weaver**.

Red-billed Hornbill, which joined us for breakfast at our lodge in Lake Baringo.

After getting all of our targets at Lake Baringo it was time to head south across the equator and into the magical Lake Nakuru National Park. Famous for its million or so flamingos the lake didn't disappoint as we entered the sea of pink. Scouring the shoreline we also had amazing views of **Greater Painted-Snipe** as well as a few migratory shorebirds like **Ruff**, and **Common Greenshank**. The park is also famous for its sizable population of White Rhino, of which we found 8, including a mother and young. We were even lucky enough to find 2 Black Rhinos in the surrounding forest. Another spectacle were the huge numbers of **Great White Pelican**, nearly pink in their breeding plumage it was amazing to see hundreds of these giant glide over the glass water in evening light. Our final surprise of the day came around sunset as the rare Striped Hyena trotted across the road in front of us. A very lucky sighing indeed, as this bone eating specialist is much more shy then the common Spotted Hyena.

Male Lion showing his hardware, Lake Nakuru.

#### July 26: Lake Nakuru to Lake Naivasha

Continuing on our journey of the Rift Valley Lakes we were on our way south again, but not before stopping to watch the magnificent White Rhinos as they slowly grazed on the lake side grasses. The mix of Rhinos and flamingos has to be seen to believe. On our way to Lake Naivasha we made an afternoon trip to Hell's Gate National Park. Taking advantage of being able to walk around outside of the vehicle, in a park still with big game, we were able to track down the breeding colony of **Rueppell's Griffon**, and even a flyover **Verreaux's Eagle** on the endless search for their Hyrax prey. Birds were a little slow down near the river but we did find **Red-fronted Tinkerbird**, and **Crimson-rumped Waxbill**. On the way out we finally found some **Mottled Swifts** swirling overhead. Now we were off to Lake Naivasha where our lodge grounds are quite birdy,

and well maintained with beautiful yellow Fever Trees with Waterbuck and Bushbuck grazing right outside your door.

Baby White Rhino "shuffelin", Lake Nakuru.

#### July 27: Lake Naivasha to Aberdares NP to Mount Kenya

Leaving Naivasha we began to climb high into the Aberdares Mountains in hopes of some high elevation specialties. Nearing the top the vegetation changes to Moorland with Giant Lobelias. A big target at the top was the very range restricted **Aberdare Cisticola**, which we found quite easily. Also at the top were **Moorland Chat**, many **Auger Buzzards**, the plump **Jackson's Francolin**, and **Mountain Yellow Warbler**. Unfortunately that is when the weather moved in on us making the road quite interesting and the wildlife calm down a bit. That being said we still saw African Forest Elephant, Giant Forest Hog, Spotted Hyena, huge Warthogs, and many Buffalo and Waterbuck. **Kenrick's, Waller's**, and **Slender-billed Starlings, Thick-billed Seedeater**, and the beautiful **Hartlaub's Turaco** also made an appearance lower down.

Moving along to Naru Moru for the night at the foot of Mt. Kenya, we first had to cross some wide open plains where we found our only **Capped Wheatear** of the trip.

#### July 28 & 29: Mount Kenya

Our two days exploring the slopes of Mount Kenya's Afro-montain forest was very wet but also productive. On our first day **Scaly Francolin** was first to make an appearance as a small family group cross the road in front of us. At our highest point of elevation we had great views of **Abyssinian Ground-Thrush, Crowned Hawk-Eagle**, and the crazy **White-headed Woodhoopoe**, while **Red-fronted Parrots** were constantly flying overhead. During our night at the very posh Mountain Lodge we watched Elephant and Buffalo drinking at the lodges floodlit waterhole. These waterholes can attract anything at any time, so sleeping just didn't seem right. Late into the night we were all rewarded first with a White-tailed Mongoose, and then a Leopard came in for a drink!! It was amazing to see these higher elevation Leopards with thick fur coats, making them look much larger than their savannah relatives.

Our next full day was also wet but many target birds were still acquired. The stunning **Abyssinian Crimsonwing, Black-headed Apalis, White-starred Robin,** and **White-browed Crombec** all were found before breakfast. Moving into other areas of the forest towards Castle Lodge we got into a flock containing **Moustached Tinkerbird, Tullberg's Woodpecker, Brown Woodland-Warbler, Black-fronted Bushshrike**, and **Rueppell's Robin-Chat**. Birding around the lodge gardens produced **Tacazze, Olive**, and **Eastern Double-collared Sunbirds**, while **Streaky Seedeaters** foraged for seeds. Nearby a group of noisy **Hunter's Cisticola's** definitely made themselves heard. Then, while watching a small party of **Kandt's Waxbills** near the lodge pool we had to move far out of the way as a family group of Elephants came to the pool for a drink! It was amazing to watch these massive beasts from the lodge balcony with a cold beer in hand. As day turned to night for us on Mt Kenya, and after an amazing dinner, we were successful in spotlighting 2 **Montane Nightjars** as they foraged around our bungalows.

A few Speckled Mousebirds hanging out on the slopes of Mt. Kenya.

## July 30: Mount Kenya to Nairobi

Our first stop today was to strange cultivation and scrub habitat for the rare and endangered **Hinde's Babbler**, which also happens to be a Kenyan Endemic, needless to say a major target. Clambering around the steep slopes it took some time to find our target, but suddenly we hear the restless chatter of a group of them babblers. After another 30 minutes of effort we eventually got great, prolonged, views of these cool birds. Our next target was at a well known stakeout for **Cape Eagle-Owl**, and with the help of a local guide we had amazing views of a roosting female. We arrived at our hotel in Nairobi with enough time to catch up on some laundry, relaxation, and bird lists, in preparation for our second stage of the tour into the east.

The most photographed bird species in east Africa, the Lilac-breasted Roller.

## July 31: Nairobi to Tsavo West

This morning we covered a lot of ground, eventually making it to the dry, acacia dominated Tsavo West NP. Great birding was had simply around the entrance gate, where the best birds were; **Pallid Honeyguide, Gray-headed Silverbill, Red-bellied Parrot, Tiny Cisticola**, and **Hunter's Sunbird**. Starting our game drive we stumbled upon **Black-faced Sandgrouse**, and multiple **Buff-crested Bustards**. While some target sunbirds included; **Black-bellied, Tsavo**, and **Eastern Violet-backed Sunbirds**. Moving on to our very nice lodge, with a Spotted Hyena near the entrance, we dropped our bags and watched the sunset in hopes of the star attraction here. This lodge is famous for its "Leopard feeder" where they put our a large piece of red meat to see what comes in. After a mere 20 minutes we were watching a Leopard feeding no more then 50 feet away from the bar, a perfect spot. After our dinner a family of South African Porcupine also came into the light. These weird creatures look like an American Porcupine but with quills 5 times longer. Watching the floodlit waterhole only produced a couple of Buffalo, so we called it a night after a long day.

Some people feed finches sunflower seed, some go a little bigger, same principle. Leopard in Tsavo West NP.

Beautifully patterned and confiding, this Black-faced Sandgrouse was a great find.

#### August 1: Tsavo West through Tsavo East and to Malindi

The drive through Tsavo East was very dry, and it was clear at the large population of Elephant were taking out their anger on the former trees. Birding was tough at times but we still found some great targets. The first **European Bee-eaters** had arrived here but were quickly trumped by the much less common **Somali Bee-eater**. A **Rosy-patched Bushshrike** hoped up to the top of a bush, while a large group of **Vulturine Gunieafowl** crossed the road in front of us. Further east, and closer to the coast, we finally found our **Golden Pipit** target. Possibly the best looking in the family, these birds look more like yellow butterflies when in flight.

A Von der Decken's Hornbill in Tsavo East NP.

Arriving at the coast, and a brand new forest type we started right off the bat looking for the prize bird in the area, the very local **Sokoke Scops-Owl**. The use of a local guide here is critical, and we had arranged to meet our guide at a random exit trail on the side of the road. We said our hellos and quickly went into the coastal forest where he had already tracked the Owls to their roosting perch at 4am this morning. All we had to do was walk up to them. This was a simply amazing and efficient sequence of events to get us onto these rarely see owls. Next we carefully birded some nearby agricultural fields where we found the very scarce **Malindi Pipit** foraging around the dirt clumps of a squash field. Now off to the hotel for a well earned dinner.

Voted cutest bird of the trip, these rare and local Sokoke Scops-Owls are a trip highlight.

## August 2 & 3: Arabuko-Sokoke Forest, Mida Creek, and Sabaki River Mouth

Our first morning in this isolated patch of coastal forest was one of the most productive birding mornings I have add in Kenya. We nearly got all of our targets in about 3 hours. To start things off we found the endangered and rare Golden-rumped Elephant-Shrew. A strange prehistoric mammal, it is often considered one of the top mammals in the world. Over head a **Lizard Buzzard** perched while a **Green Barbet** was calling from the same tree. Into a great forest road we got into some nice flocks picking up **Eastern Green Tinkerbird**, **Mombasa Woodpecker**, **Fischer's**, **Tiny**, and **Yellow-bellied Greenbuls**, **Red-tailed Ant-Thrush**, **Little Yellow Flycatcher**, and both **Forest** and **Pale Batis**. Some tougher regional specialties were also found on the first morning, best of which was the very underrated **Sokoke Pipit**, the skulky **East Coast Akalat**, both **Amani** and **Plain-backed Sunbirds**, and **Peter's Twinspot**. More forest birding the following morning had us finding the beautiful **Fischer's Turaco**, **Chestnut-fronted Helmetshrike**, **Four-colored Bushshrike**, **Easter Nicator**, and even a perched **Southern Banded Snake-Eagle**.

The shy Sokoke Pipit is an odd and beautiful species of the coastal forest floor.

The afternoons were spent along the coastal mangroves and flats of Mida Creek and Sabaki River Mouth. We found some great shorebirds at low tide from the monotypic **Crab Plover**, to the squat **Terek Sandpiper**, and the elongated **Eurasian Curlew**. The coastal scrub held **Zanzibar Bishop**, **Golden Palm Weaver**, and even **Violet-breasted Sunbird**. On the coast we found 6 species of terns plus **Sooty Gulls**. As the light faded on our final day in the area we watched **Collared Pratincoles** flying around us on the sand dunes, a great way to end our time here.

#### Aug 4: Malindi to Mombasa then flight to Nairobi

Our final day we needed to leave our hotel early to catch flights back to Nairobi connecting to International flights home. This concluded a very productive trip, filled with wildlife spectacles beyond belief, a trip of a life time none of us will soon forget. A big thank you to our driver Peter who not only has great driving skill on some very exciting roads to say the least, but he also has an intimate knowledge of the birds, and is a great spotter as well.

# **BIRD LIST**

Taxonomy and nomenclature for this list largely follow: *The Birds of East Africa* by Terry Stevenson and John Fanshawe.

- 1 Ostrich
- 2 [Somali Ostrich]
- 3 White-faced Whistling-Duck
- 4 White-backed Duck

*Struthio camelus [Struthio camelus molybdophanes] Dendrocygna viduata Thalassornis leuconotus*  5 Comb Duck 6 Egyptian Goose 7 Spur-winged Goose 8 African Black Duck 9 Yellow-billed Duck 10 Red-billed Duck 11 Hottentot Teal 12 Cape Teal 13 Southern Pochard 14 Maccoa Duck 15 Helmeted Guineafowl 16 [Kenya Crested Guineafowl] 17 Vulturine Guineafowl 18 Coqui Francolin **Crested Francolin** 19 20 Shelley's Francolin 21 Scaly Francolin 22 Hildebrandt's Francolin 23 Yellow-necked Francolin (Spurfowl) 24 Red-necked Francolin (Spurfowl) 25 Jackson's Francolin 26 Common Quail 27 Harlequin Quail 28 Little Grebe 29 Eared (Black-necked) Grebe 30 Greater Flamingo 31 Lesser Flamingo 32 African Openbill 33 Woolly-necked Stork 34 Saddle-billed Stork 35 Marabou Stork 36 Yellow-billed Stork 37 Great Cormorant 38 Long-tailed Cormorant 39 African Darter 40 Great White Pelican 41 Pink-backed Pelican 42 Hamerkop 43 Little Bittern 44 Gray Heron 45 Black-headed Heron 46 Goliath Heron 47 Purple Heron 48 Great Egret 49 Intermediate Egret 50 Little Egret 51 Cattle Egret

# MAMMAL LIST

This list follows the Kingdon Field Guide to African Mammals (2003) by Jonathan Kingdon.

	This have to be the Hingdon T teta Onide	(2000) by solidinal Hingdon
1	Guereza Pied Colobus	Colobus guereza
2	Olive Baboon	Papio anubis
3	Yellow Baboon	Papio cyanocephalus
4	Vervet Monkey	Cercopithecus aethiops pygerythrus
5	Sykes Blue Gentle Monkey	Cercopithicus nictitans stuhlmanni
6	Red-tailed Monkey	Cercopithicus ascanius schmidti
7	Northern Greater Galago	Otolemur garnettii
8	Hairy Slit-faced Bat	Nycteris hispida
9	East African Epauletted Fruit Bat	Epomophorus minimus
10	Yellow-winged Bat	Lavia frons
11	Golden-rumped Elelphant-Shrew	Rhychocyon chrysopygus
12	Scrub Hare	Lepus saxatilis
13	Cape Hare	Cercopithecus ascanius
14	Striped Ground Squirrel	Euxerus erythrops
15	Unstriped Ground Squirrel	Xerus rutilus
16	Ochre Bush Squirrel	Paraxerus ochraceus
17	Red-legged Sun Squirrel	Heliosciurus rufobrachium
18	Springhare	Pedetes capensis
19	South African Porcupine	Hystrix africaeaustralis
20	Black-backed Jackal	Canis mesomelas
21	Side-striped Jackal	Canis adustus
22	Bat-eared Fox	Otocyon megalotis
23	Egyptian Mongoose	Herpestes ichneumon
24	Banded Mongoose	Mungos mungo

25	White-tailed Mongoose	Ichneumia albicauda
26	Slender Mongoose	Herpestes sanguinea
27	Dwarf Mongoose	Helogale parvula
28	Striped Hyena	Hyaena hyaena
29	Spotted Hyena	Crocuta crocuta
30	Common Genet	Genetta genetta
31	African Civet	Civetticus civetta
32	Wild Cat	Felis sylvestris
33	Serval	Felis serval
34	Leopard	Panthera pardus
35	Lion	Panthera leo
36	Cheetah	Acinonyx jubatus
37	Yellow-spotted Hyrax	Heterohyrax brucei
38	Black-necked Rock Hyrax	Procavia johnstoni
39	Eastern Tree Hyrax	Dendrohyrax validus
40	African Savannah Elephant	Loxodonta africana
41	African Forest Elephant	Loxodonta cyclotis
42	Common Zebra	Equus quagga boehmi
43	Black Rhinoceros	Diceros bicornis
44	White Rhinoceros	Ceratotherium simum
45	Hippopotamus	Hippopotamus amphibious
46	Common Warthog	Phacochoerus africanus
47	Giant Forest Hog	Hylochoerus meinertzhageni
48	Giraffe	Giraffa camelopardalis
49	African Buffalo	Syncerus caffer
50	Bushbuck	Tragelaphus scriptus
51	Lesser Kudu	Tragelaphus imberbis
52	Eland	Taurotragus oryx
53	Bush Duiker	Sylvicapra grimmia
54	Suni	Nesotragus moschatus
55	Bohor Reedbuck	Redunca redunca
56	Steinbuck	Raphicerus campestris
57	Kirk's Dikdik	Madogua kirkii
58	Common Waterbuck	Kobus e. ellipsiprymnus
59	Thompson's Gazelle	Gazella rufifrons
60	Grant's Gazelle	Gazella granti
61	Gerenuk	Litocranius walleri
62	Impala	Aepyceros melampus
63	Торі	Damaliscus lunatus topi
64	Coke's Hartebeest (Kongoni)	Alcelaphus buselaphus cokei
65	Blue Wildebeest	Connochaetes taurinus
66	Beisa Oryx	Oryx beisa
